

## TRULY CARDUI IS GOOD TONIC

Says a Texas Lady who Writes to Tell of Great Benefit It Was to Her in Ending Long Suffering.

Commerce, Texas.—"I had suffered painfully every month since eleven years ago," writes Mrs. L. R. Hamilton, of this place, "and for almost two years had suffered untold agony. I began taking Cardui, and I find so much relief. I keep it all the time, and always praise it to my friends. Truly Cardui is the best tonic for women I ever saw, so I am writing a few words to tell you of the relief I obtained from your medicine. I can't praise it too highly."

The best way to cure female troubles, pains, headache, backache, etc., is to help nature to do it, by taking Cardui. Is life a burden to you? Act at once. Get a bottle of Cardui at the drug store today and try it. You will probably feel better tomorrow.

Not alone for woman's pains is Cardui of benefit, but also for woman's weakness, debility, lack of energy, loss of appetite, nervousness, etc. It is a true tonic, helping to build up the flagging forces.

Cardui has brought health and happiness to thousands of weak women. Why not to you?

Try Cardui.  
N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper on request.

## DRINK MILK---DRINK PLENTY OF IT---DRINK EL PASO PURE--MILK

There is more food value in one quart of El Paso Pure Milk than there is in one pound of the choicest porterhouse steak. El Paso Pure Milk is pure milk. It comes from inspected, contented cows, and is treated by the most scientific methods. Delivered to you in sterilized airtight bottles.

## RICH SILVER IN HUNTED MINE

El Pasoans Make Strike in Property That Has a History.

A remarkably rich silver discovery has been made recently in the Sierra de Los Muertos, or "mountain of the dead," also called Duende, or haunted mountain) about 60 miles southwest of El Paso, in northern Chihuahua.

The discovery consists of silver sulphides, of high grade, at the very surface. A shaft was sunk 25 feet and a general average sample of 600 pounds of ore was shipped to the El Paso smelter, which ran 365 ounces silver and one and one-half percent copper. Having proved that the rich ore is going down the owners let a contract and the shaft is being sunk to the 100 level, from which point two drifts will be run each way in the vein.

El Pasoans are Owners.

If the vein continues to hold its values, the owners will afterward sink another hundred feet, and from that level run similar drifts in the vein. There are back breaks of clean metal, assaying 6000 ounces silver per ton. The collar of the shaft is well timbered.

The owners are 10 employees of the El Paso smelter, among whom are Gus Hammel and Joseph Seaton. Mr. Hammel, an experienced miner of many years, is general manager. The company is called Los Americanos Mines company.

Los Muertos (or Duende) mountain is a solitary range rising like a spectral island from the surrounding Barreal. The Barreal is a white plain extending from New Mexico, south to San Jose station on the Mexican Central, and from 15 to 20 miles wide. It is as level as a floor. Mirages are almost constant, giving the "Barreal" the appearance of a vast lake or inland sea enclosing the Muertos mountain island.

This mountain is about 10 miles long and two or three miles wide, and covered with grass and a few scattered oak and junipers, which make it appear a real oasis in the surrounding desert. Recently water has been found in the mountain sufficient for camp purposes.

Mine With a History.

The mine is about 20 miles southeast from Kilometer 95, a station on the Mexico Northwestern railway. The name of this mysterious solitary mountain is said to have originated from the story of the Mexican Revolution, that several years ago two American prospectors were mining there all alone, and they used to take turns packing water from the distant San Blas mountain. Finally one was seen riding away and he never showed up again.

An investigating party afterward visited the mountain and found the dead body of the other in a cabin with every appearance of having been murdered. Samples of very rich silver ore were piled up around the cabin. Filled with superstitious dread, after burying the body, they hurried away without searching for the mine.

Strikes in Desert.

Tonopah, Goldfield and other Nevada camps were found in the midst of desert wastes, and the physical surroundings of Las Muertes, and Los Americanos mines are very similar.

DULUTH MEN DEVELOP

MINE IN STEEPLE ROCK DISTRICT

The Torroco Mining company, of Duluth, Minn., is developing a mining property in the Steeple Rock district in Grant county, southwestern New Mexico. A shaft has been sunk on a vertical vein to a depth of 275 feet in pay ore from the surface. The ore values are about \$15 per ton, of which values 75 percent is in gold and 25 percent is silver.

The company was organized by Harold C. Spence, a mining engineer who has spent considerable time in that district examining and developing several properties. The company is composed of some of the wealthiest citizens of Duluth, who have made their money in iron and copper mining. Nearly all the men on the directorate are mining engineers, and the company is a close corporation.

We have moved to main floor of Morgan building, on Mesa avenue, next to Callisher's, Latta & Happer.

## MILD WASH CURES ECZEMA

Ordinary oil of wintergreen, mixed with thymol, glycerine and other ingredients, is known to cure skin diseases. This prescription, known as D. D. D. prescription can now be obtained on a special offer in a 25c bottle.

That a permanent cure can be effected by the first bottle we cannot guarantee. But ten years of experience have shown us that every sufferer gets instant relief from the itch; you will feel soothed and refreshed at once.

Call at our store and we shall be glad to tell you more about this standard eczema cure. Be sure to ask for the right name: D. D. D. Prescription.

Kelly & Pollard.

## Vapo-Cresolene

(Established 1879)

An Inhalation for

Whooping-Cough, Croup,

Coughs, Colds, Catarrh,

Bronchitis, Diphtheria.

Cresolene is a Boon to Asthmatics.

Does it not seem more effective to breathe in a remedy for diseases of the respiratory organs than to take the remedy into the stomach?

Cresolene cure because the air, rendered strongly antiseptic, is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.

For irritated throat there is nothing better than Vapo-Cresolene Throat Tablets.

Send postal for descriptive booklet.

ALL DRUGGISTS.

Vapo-Cresolene Co., 200 Fulton Street, New York.

DANDERINE

Produces thick, luxuriant hair when all other remedies fail. We guarantee Danderine. All Druggists, 25c, 50c and \$1, or send this Ad with 10c (stamp or silver) for a large free sample.

KNOWLTON DANDERINE CO., Chicago, Illinois.

## CHINO TONNAGE SHOWS INCREASE

Company to Erect Small Refining Plant in Santa Rita.

Superintendent J. M. Sully's last report on the Chino mines in the Santa Rita, N. M., states that there has been a very rapid increase within the past month in the ore tonnage and that the present indications are that there will be very material extensions in the two ore bodies, the Hearst and the Bliss, which have recently added such large tonnages to the ore reserves.

The drills have been removed from the last named mines and placed in the undrilled spaces connecting the Texas Flat and the Chino Hill ore bodies and the Romero and the Alt. Shaft ore bodies.

The location for the main work shaft has now been located, and sinking will be started within this month. The design for hoisting apparatus will be similar to that in the Ray mine.

LLUVIA DE ORO DEVELOPMENT

Vein Being Worked in Extension of the Lucky Tigre.

The Lluvia de Oro mining company is the owner of the extension of the Lucky Tigre gold mine, of famous wealth, being only separated by the South Tigre mine, which property lies between the two named.

The company owns some 260 pertenencias, having taken over besides the Lluvia de Oro proper, a large number of mineralized pertenencias denominated under the name of "Stockhook" by some evidently patriotic Swedes.

The principal vein is gold; and extensive explorations and developments are carried on by capital furnished by a few wealthy west Texas cattlemen and capitalists.

At present, most of the work is being done on the Lluvia de Oro, where eight to 14 feet of vein matter, averaging \$35 in gold per ton, is under development. Frank Wheeler is in charge of the operations.

Five miles south of the Lluvia de Oro is located another gold-silver property called Temple. The pay streak is only eight inches thick, but the assays give an average of \$100 per ton. The mine is owned by C. H. Lind, who is associated with Mr. Wheeler in these mines, is at the Ziegler.

## ARIZONA MINE SHIPS ORE HERE

Samples From Rich Strike in Paradise District Assayed in El Paso.

Meyers and Boland, who are operating the Scott and Crawford mine in Paradise camp, Arizona, have received the return from the El Paso smelter on 14 tons and 345 pounds of lead-silver ore recently shipped from that mine. The ore yielding \$32.34 gross per ton, the net amount being \$28.61 per ton, carrying 45 1/2 percent of lead and 13 1/2 ounces silver a ton. The smelter charges were only \$2.73 per ton. After deducting hauling, freight and transfer charges, from mine to smelter, the 14 tons and a fraction netted \$219.85.

From Wood canyon in the Paradise district, Duncan MacDonald brings back news of a rich gold strike made recently in that mountain, just west of the old Hancock ranch. The strike was made by Billy Smith. Assays made of samples of the strike, in El Paso, gave returns of five ounces gold and another specimen gave 50 percent copper per ton.

## SHATTUCK DEVELOPING LARGE ORE BODIES

On the 600 level of the Shattuck in Bisbee there is an ore-body 355 feet long and six to 15 feet wide. This is a solid high grade oxide, with considerable cuprite in it, going better than 20 percent. This body is capped up to a 500 level and by a winze to 40 feet below the 600 level. This ore body has a value of more than \$2,500,000.

On the same level in another place is a body of ore about 1800 feet long, which extends to the 500 and above it. What is between the fifth and sixth levels of this ore body has a value of more than \$1,500,000.

A third body of good grade oxide has been found in this same level, 50 by six feet.

Two bodies of sulphide and one of oxide ore opened up in the seventh level, while on the 800 level there has been opened one body of sulphide alone that is 125 to 135 feet, which assays 41.20 percent copper, although some of it runs 12 percent. On this level is the largest oxide body in the mine, running 7 percent, which is being kept for future use.

On the 900 level, in one drift a bunch of sulphide has been cut 70 feet, and prospecting has only begun.

## TO ERECT NEW MILL ON CHIHUAHUA PROPERTY

Chihuahua, Mex., April 12.—It is expected that the Palmarejo and Mexican Gold Fields, Ltd., an English concern, will by the end of this year begin the construction of a 300-ton mill at its Palmarejo mines near Chihuahua, in extreme western Chihuahua.

The company's old mill has been shut down for the past two years and extensive development has been going on. The greater part of this time the development work has been going on in the company's Prieta lode and a large tonnage is ready for stoping. The company has decided to equip the mine with a new and up-to-date machine drilling plant.

Geo. E. Stephenson, the manager, recently went to the United States to purchase the plant.

## How To Get Instant Relief From Itching Skin Diseases

An inflammation of the skin caused by the presence of a tiny mite which burrows in the skin, causes the itching in Eczema, Tetter, Acne, Itching scalp and feet, Prickly Heat and the many other forms of skin diseases. Scratching does not relieve nor cure. It only aggravates the case and makes it worse. There is only one way to cure—kill the mite and so remove the cause. Little's Liquid Sulphur Compound gives instant relief. The first application and in a short time kills the mite and gives a permanent cure to every form of skin trouble. Write for bottle postpaid for 10c. Rhuma-Sulphur Co., St. Louis.

## CLOSE BIG DEAL FOR MEXICO MINE

Company Financed in London To Work Property in Pachuca.

A prominent mining engineer of this city has just received advice from London, England, that another big mining transaction has been consummated on the Santa Cruz de Alamos mine, an old Spanish property, in Pachuca, Mexico, by Prof. Robert T. Hill, the eminent geologist, who passed through here a few weeks ago on his way from the mine to England. He has successfully financed the affairs of the Bonanza Mining company, limited, in London, and is now simply arranging the details for operations on a large scale upon his return to this country.

Prof. Hill and associates purchased a half interest in the mine from the Mexican owner and, with him, have formed a Mexican holding company to hold the title, which consisted of only 500 shares. They have already expended over \$250,000 in improvements, new developments and installing a mill, cyanide plant, hoists, power and pumping plant, and have every assurance that the property will be a big paying one in a very short time. In London is reorganization was effected and a new company formed with a capital of \$2,000,000, limited. The Bonanza Mining company, limited.

On Bonanza Vein.

The property owned by this company has a superficial area of 87 pertenencias, or 215 acres, and is about three kilometers north of the great Santa Gertrudis property, lately purchased by the Camp Bird company, for \$9,000,000 cash, and is on the same lode, the Viscaina vein, which averages from 17 to 18 feet in width and attains, in places, a size of as great as 40 to 45 feet.

This vein has been traced on the outcrop, running from north to south, a great distance, being distinctly shown for 15 kilometers, the longest continuous mineral belt in the republic of Mexico. It has been worked for at least eight kilometers of this distance, yielding many millions of dollars, coursing through such bonanzas as the Rosario, Santa Gertrudis, Santa Cruz de Alamos, Guzman, Maravillas, Troubillo, Boleros and others, most of the mines having gone to considerable depth, excepting the one owned by the new company.

Rich Silver Ore.

For a decade prior to 1890 the mine was operated by the former owner and yielded over \$1,000,000, but he was compelled to quit operations when he reached a depth, comparatively shallow, of only 150 meters. The mine is said to have yielded several millions in the century preceding.

The ore averaged in the upper workings 37 ounces of silver and were growing richer as depth was reached. Mining operations in depth in the Viscaina vein in the Pachuca district have proved the ore bodies to be persistent; richer and larger ore bodies having been found in the deep workings than near the surface.

The deepest workings of the Pachuca district are those of the Santa Gertrudis Mining company, which reach 1400 feet.

## Cyanide Plants.

There are now installed in the Pachuca district six large modern cyanide plants, with a capacity of 1500 tons per day, and two other new plants are being installed. All this is the work of the past four years.

The installation of electrical power by two companies in the district also helped to cheapen power.

## BISBEE EXTENSION TO DRIFT AT 700 FEET

At the Bisbee Extension, which lies midway between Tombstone and Bisbee, Ariz., a station is being cut at the 700 foot mark.

The shaft is down to the 800 level, but as it has encountered a little more water than the boilers can handle, the management has decided to drift on the 700 level.

Another boiler has been ordered and mechanics are putting in oil burners in the old ones, which have been burning coal. The oil will be hauled from Lewis Springs railroad station by wagon.

## SUPERIOR & PITTSBURGH HAS THREE PRODUCING SHAFTS

The Superior & Pittsburgh mine of Bisbee has now three producing shafts—the Houston, which is the chief producer, with a record of about 325 tons of 7 percent copper ore per day; the Junction shaft, of 125 tons of 5.5 percent ore a day; and the Cole shaft, with a production of 100 tons of 5 percent copper ore a day. The mines of the S. & P. now being run can easily produce 25,000,000 pounds of copper a month.

## Announcement.

Pass City Fuel Company, Geo. C. Wimberly, Owner.

Successors to Smith & Co., 311 Texas street. Dealers in coal, wood, hay, straw, chops, oats, corn, cement, etc. Phones, Automatic 1818; Bell 1479.

Having returned to El Paso to live, I respectfully ask for a share of the patronage of my friends and the general public, promising satisfaction as far as it is in my power to give it.

Geo. C. Wimberly.

## Announcement.

Having sold my fuel and feed business, at 311 Texas street, to the Pass City Fuel Company (Geo. C. Wimberly, Owner), I respectfully request that my friends and customers continue their patronage with the new company. I will continue with the new company as office manager.

Smith & Co., By R. H. Smith.

We have moved to main floor of Morgan building, on Mesa avenue, next to Callisher's, Latta & Happer.

## CONTRACT LET FOR THE FABRICATION OF THE FABRICATION ROAD

C. M. McKinney Is Given the Contract for the Grading.

Monday afternoon, after they had gone into executive session on the usual motion of commissioner Sam J. Freuden-thal, the county commissioners are grading the hill of C. M. McKinney for grading the Chino-Fabre road a distance of seven and a half miles, which McKinney agreed to do for \$6600, less 1 percent of the net net cost.

County road engineer Meadows was then instructed to prepare plans and specifications for rock work to be done on this road and report back to the commissioners at the next meeting in May.

A vote of thanks was extended Mrs. J. Solomon for installing a filtration plant at the county hospital.

## April Sale Embroideries & White Goods

The Unmatchable Offerings Continued, With Several Extra Specials Added

WE WERE satisfied—our customers were satisfied. The unqualified success of the first day's sales has proved the genuineness and worthiness of the bargains offered. All the special items previously announced will still be effective, except in some instances where the lines were completely exhausted.

## Embroideries

All lines of Embroideries have been replenished except those advertised as Lines 4 and 5, which sold out entirely in the first day's sale. Values in the other lines have been enriched by the additions.

LINE 1—Embroideries and insertions worth up to 25c, for 9c

LINE 2—Embroideries and insertions, white and colors, worth up to 35c, for 14c

LINE 3—Embroidered flouncings, 18 to 22 inches wide, worth up to 50c, for 22c

Sale White Goods All This Week

## A. J. KING SECURES CINCO DE MAYO AND OTHER PROPERTIES FOR \$500,000

Former Operator of Famous Property Now Interested With New York Capital.

Douglas, Ariz., April 11.—Announcement is made that A. J. King has obtained an option on the famous Cinco de Mayo mine, the mother of the fame that has grown to great proportions because of the following strikes made in El Tigre and other mines in the Lucky Tiger district, south of Douglas, Ariz., and in the famous Cinco de Mayo mine, a New York and King's associate paid down a cash partial price, and signed up papers with the owner, Col. Francisco Garcia, of the City of Mexico. An engineer representing these men will arrive in Douglas from New York to look after the property.

Mr. King, 50 years old, in conjunction with Col. Garcia, operated the Cinco de Mayo, and in 14 months took out of the mine 640,000 worth of silver. One ton of ore ran as high as 21,000 ounces of silver and there were many which went as high as 15,000. The richest ore was chloride, the other rich ore bodies being caliche, argente and pure stephanite. About six or seven thousand feet of development work has been done in the mine, one tunnel alone running about 1200 feet. Since King ceased to operate the mine, which passed out of his control in a technical way, Col. Garcia has worked the mine from time to time, and other work has been done in this development.

When A. J. King operated the mine the Cinco de Mayo property included only 30 pertenencias, but now it is now La Derrota, or the Cinco de Mayo denunciations. The option now includes the following claims in addition to the La Derrota denunciations: The Sampson, with 5 1/
